Restaurants

Reduce coronavirus in the air.

The eliminate rate of coronavirus in the air is $\geq 99.99\%$

Effectively block the virus transmission by air.

Remove 97% of aerosol at 60m³ within 55min

Effectively remove all kinds of particulate matters.

100 million biological particles were removed per minute on average.

CKER VIRUS PURIFICATION SYSTEM

TRIPLE ANTIVIRUS

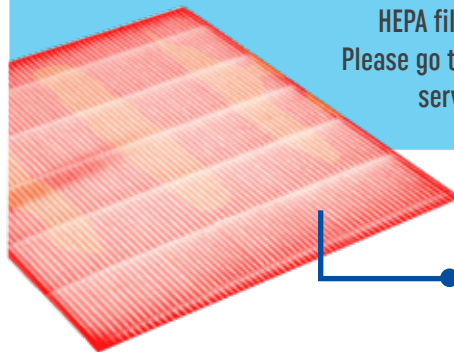

CEP plasma constant efficiency purification technology

HEPA13 high-efficiency filtration

High temperature inactivation by intelligent precise temperature control system

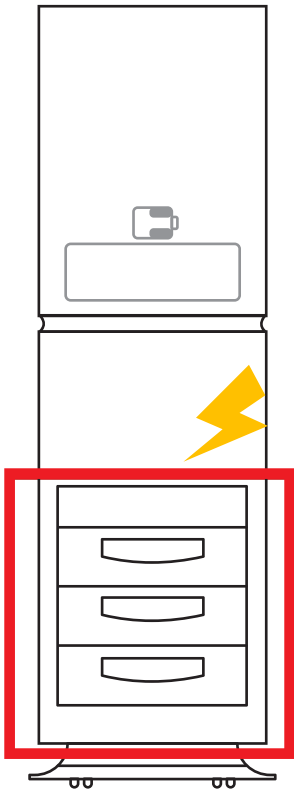

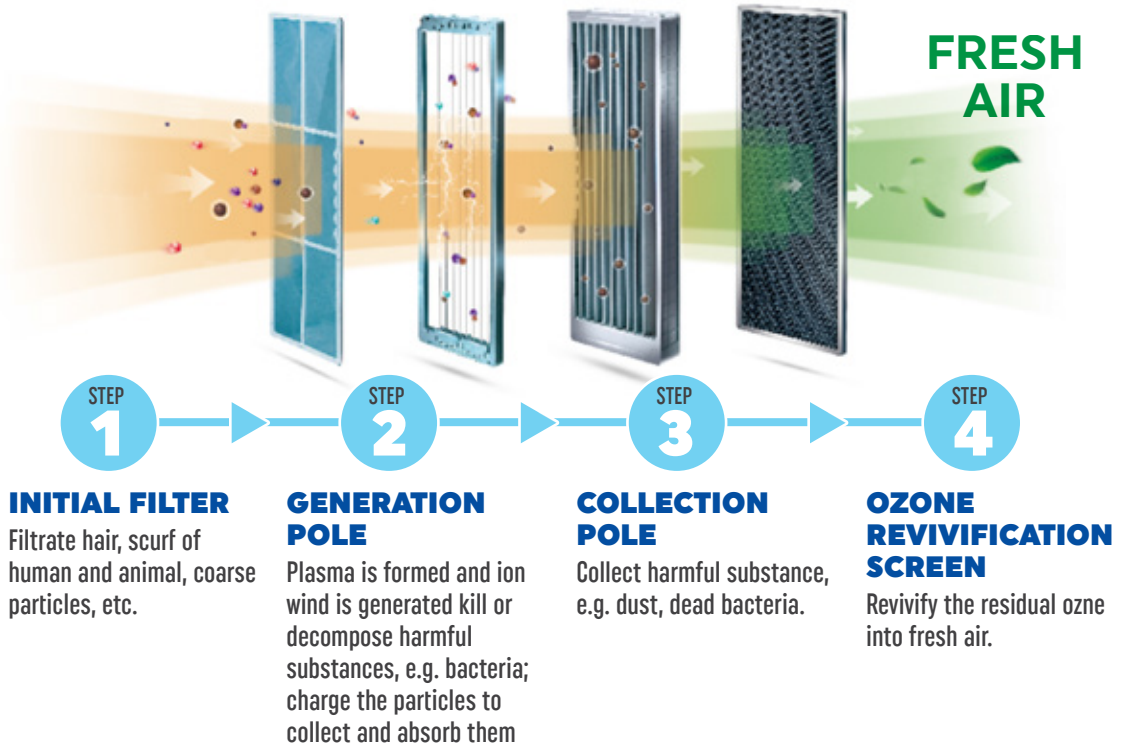

THE CEP PLASMA DESTROYS THE PROTEIN AND ELIMINATES THE VIRUS

HEPA filter and ozone deoxidized filter can be washed. Please go to the designated service provider or customer service center to purchase them for replacement.

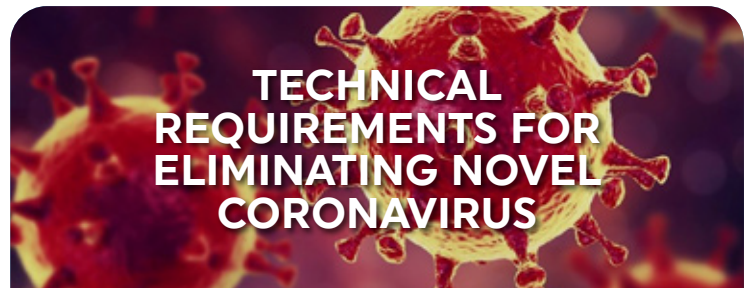

Gree's self-developed smart temperature control system can accurately control the temperature, keeping the surface of the filter at a high temperature of above 132.8° F, and eliminated the novel coronavirus.

Rated Voltage	V~	220-240V~
Rated Frequency	Hz	50/60Hz
Suitable Area	m ²	21-36
Air Flow Volume(H)	CFM	177.8
Suggested Room Size	FT2	270-450 Ft2

**THE FIRST SAFEGUARD:
CEP PLASMA CONSTANT
EFFICIENCY PURIFICATION
TECHNOLOGY**

The technology uses corona discharge to produce plasma, which destroys bacteria and viruses and inactivates them. The inactive bacteria and viral debris are collected together

**TECHNICAL
REQUIREMENTS FOR
ELIMINATING NOVEL
CORONAVIRUS**

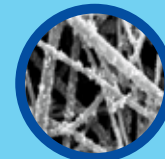

NOVEL CORONAVIRUS STRUCTURE:

Protein + genetic material

The researchers found that the S protein on the envelope of the coronavirus plays a key role in virus recognition and invasion.

The plasma destroys the protein and eliminates the virus

Catch viruses that have lost their infectivity and the viruses that have not been eliminated in time

Eliminate the virus by high temperature of 56°C continuously and completely block and reduced the novel coronavirus in the air
